

Incident Response Standard Operating Procedure

Document owner: Site Reliability Engineering. Last updated: January 2026.

1. Overview: This document defines how production incidents must be detected, logged, and escalated.
2. Logging Requirement: All production incidents must be logged in the incident tracker within 30 minutes of detection.
3. Severity Levels: Incidents are classified as SEV-1 (full outage), SEV-2 (partial degradation), or SEV-3 (minor, non-customer-facing).
4. Escalation: SEV-1 incidents must be escalated to the on-call manager immediately after logging, via the incident paging system.
5. Postmortems: A written postmortem is required within 5 business days for every SEV-1 and SEV-2 incident.
